COPY 12

3 May 1963

MEMORANDUM FOR: Chief, Materiel Division, OSA

THROUGH : Deputy for Field Activities, OSA

SUBJECT : Materiel Inputs for ONCART Contingency Staging Plan

1. To complete the ONCART Contingency Staging Plan by 15 May 1963, we would appreciate receiving your construction, equipment and cost inputs as soon as possible. This would also allow us to include an amount for ONCART staging in the 1964 budget.

2. The breakdown desired is as follows:

a. A recommendation of construction needed at Kilauea, Hawaii, to include a brief description of facilities planned, estimated cost, construction time, and any limiting factors.

b. A listing of what emergency retrieval equipment will be propositioned at each of the four emergency bases and estimated cost.

c. A listing of what equipment will be needed to support a quick turnaround staging including appropriate cost estimates. This should be primarily based on the ONCART Staging Assumptions (Attachment to ONE-4933-63, dtd 24 Apr 63) as changed by the AM/OSA at the meeting on 30 April. An identification should be made of those items you feel should be propositioned versus those supplied. Long lead time items not already on order should be indicated.

d. Contractor personnel augmentation [ ] if any.

e. Any additional comments or observations.

3. We would also appreciate receiving your opinion on the feasibility of deploying all equipment necessary for staging from  on an as-needed basis. This would mean that little or no equipment would be prepositioned apart from the emergency retrieval equipment mentioned above.
